

Module 13 Field Assignment

Between this meeting and the next you should:

- Pre-plan a task and report back to the learning group how it worked, including:
 - If the crew was receptive
 - If they identified ways to do it better before starting
 - If you think that the pre-planning gained results that were worth the investment of time up front
- Observe an on-going task to look for improvements, including:
 - What did you see that could be improved
 - If you were able to improve the performance on that task
 - If you learned something you can use in planning a task in the future
- Consider planning on a job site:
 - How often is the planning accurate? (so that the task is completed on time)
 - How often is planning inaccurate?

You should be prepared to report your observations at the beginning of the next meeting.
